PRODUCT

B2Cloud - Development of Soluções Cloud, SA. Was born in 2013 with the objective of developing and manufacturing electronic components for use in several areas. The company's mission is to develop and market electronic components that work through the cloud computing system that create value for their customers and help them reach their goals by providing them with technologically advanced solutions. The project fits the typology: "Increasing the capacity of an existing establishment", and the project is aimed at establishing the company located at Rua do Correio IV n14-4585-551 Gandra. In order to respond to the need to achieve total control over the production of its star product IZUM, and which is the result of the research and development process made by the company since the beginning of 2014, B2Cloud submitted in 2015 a project in the scope Of SI Innovation (Entrepreneurship). This investment project, called "Made for Apple Devices (MFI).", Aims to requalify the productive area of the company, which will be possible through its training through new productive, procedural and organizational methods, in order to That the company has inside doors all the tools and conditions for the development of electronic equipment IoT (Internet of Things). Will provide the company with the tools that will enable it to be on the limited list of Made For Apple (MFI) licensees, and thus reach a different target audience, which is product development companies, since they need Of a supplier capable of eliminating all production needs, from the electronic component, packaging, design, marketing.
